

## Tools Required:

- » Measuring level
- » Ladder
- » Tool case/storage box
- » Hand saw
- » Hand plane

## Tools

### Key Instructions:

1. **Check final levels and heights** - This is emphasized as an important preliminary step before installation
2. **Triangle construction varies** - Some triangles may be solid single pieces, others assembled from multiple parts
3. **Installation method** - Carefully attach triangles to the top of the walls and secure them in place
